1.INTRODUCTION

- With the advancement of cryptocurrency and blockchain technology,
- new global communities are forming around various interests.
- GHOST Coin is a community-based project that allows users worldwide to share content related to paranormal events, mysterious experiences, and haunted house explorations.
- The project includes a unique live-streaming feature that allows users to explore haunted or mysterious locations and broadcast their experiences in real-time, rewarding them with tokens for their contributions.

2.PROJECT OVERVIEW

THE GHOST COIN PROJECT HAS THE FOLLOWING GOALS:

- Establish a global community focused on exploring mysterious locations and supernatural phenomena.
- Enable users to live stream their haunted house explorations and share paranormal events in real-time.
- Reward content creators who contribute to the community with tokens
- Create a space for users to gather, discuss, and document paranormal experiences and mysteries from around the work

PROJECT VISION:

 Build a global network where users passionate about haunted houses and supernatural events can explore and livestream their experiences, connecting with viewers in real-time.

• Provide deeper understanding and more immersive experiences around mysteries and paranormal activities through active community engagement and participation.

3. COIN UTILITY AND USE CASES

HORROR COIN HAS SEVERAL PRIMARY USE CASES:

• Content Creation Rewards: Users who share their haunted house explorations or paranormal experiences with the community will be rewarded with Horror Coins. The real-time live-streaming feature allows creators to provide immersive content, which the community can reward.

 Donations and Sponsorships During Live Streaming: While users are live-streaming their haunted house explorations, viewers can donate or sponsor them using Horror Coins. This system supports content creators and enables more exciting explorations.

• Booking Tours and Experiences: Horror Coin can be used as a payment method to book tours or experiences at haunted or mysterious locations around the world, such as ghost tours or paranormal investigation sessions.

• **Community Voting**: Horror Coin holders can participate in community votes to decide on specific haunted house explorations, investigations, or provide feedback on new content.

• NFT Trading: Digital assets related to haunted houses or paranormal events can be issued as NFTs and traded. Users can own unique digital assets such as photos, videos, or records from famous haunted locations.

4. COMMUNITY AND LIVE STREAMING FEATURES

THE **HORROR COIN COMMUNITY** PROVIDES A PLATFORM WHERE USERS CAN EXPLORE HAUNTED AND MYSTERIOUS LOCATIONS AND SHARE THESE EXPERIENCES IN REAL-TIME.

• Live Streaming Exploration: Users can broadcast their haunted house or mysterious location explorations live from around the world, while other users watch and participate. Viewers can interact with the streamer through live chat, ask questions, or suggest new mysterious locations to explore.

• Content Creation and Curation: In addition to live streaming, users can share videos, photos, and written accounts of their paranormal experiences and be rewarded for their contributions.

• Real-Time Reward System: During a live haunted house exploration, viewers can send rewards or donations in the form of Horror Coins. This provides additional motivation for content creators.

5. TOKENOMICS CHOST TOKEN NAME: GHOST (\$GHOST) TOTAL SUPPLY: 1,000,000,000 GHOST

- **Distribution Plan** (Temporary)
- Community Rewards: 40%
- liquiditys: 30%
- Reserve Fund: 20%
- Development and Operations: 10%

6. TECHNICAL OVERVIEW

•Blockchain Platform: Horror Coin is built on Ethereum or Binance Smart Chain (BSC), leveraging blockchain's transparency and security to facilitate safe transactions.

 Smart Contracts: Smart contracts handle content rewards, live streaming donations, and community voting systems automatically and transparently.

•Live Streaming Feature: The community's DApp will integrate live streaming, allowing users to broadcast their explorations of haunted locations in real-time. Donations and rewards that occur during streaming are managed automatically through smart contracts.

•DApp: A decentralized application (DApp) accessible via mobile and desktop will allow users to participate in the community and its activities easily.

7. ROADMAP

Phase 1: Project Planning and Community Building Release the whitepaper and launch the community website. Token \$GHOST Issuance

Phase 2: official channel marketing Target for 10,000 total users Global Expansion and Major Exchange Listings Initiate specific DAPP development design

Phase 4: Expand global partnerships and list Horror GHOST on major exchanges. Design and test live streaming functionality.

8. LEGAL CONSIDERATIONS
